Informazioni personali

A passionate learner with a Digital Humanities background (University of Pisa), I've gained diverse experience through internships and professional roles in web development (Angular) and iOS mobile development (Swift). Currently, I leverage my skills as a Web Developer building interactive web applications. Highly adaptable and a strong communicator, I thrive in collaborative environments and am always eager to share knowledge and explore new horizons.

Esperienza lavorativa

Frontend developer | BV TECH | 01/10/2024 - Attuale | Milano, Italia

Design and development of modern web applications using Angular, contributing to the full feature lifecycle from requirements analysis to delivery. Experience in structuring frontend codebases with a strong focus on modularity, reusability, and long-term maintainability, including component-based architectures and shared design systems. Daily collaboration with designers, backend engineers, and stakeholders, translating business requirements into clear, scalable, and well-structured technical solutions. This role strengthened communication, coordination, and the ability to work effectively within cross-functional teams while maintaining attention to code quality, UX, and accessibility.

Used to managing tasks autonomously, organizing work according to priorities and deadlines, and continuously refining development practices by following Angular ecosystem updates and modern frontend best practices.

Web programmer | Xacria S.r.l. | 01/09/2023 - 01/09/2024 | Catania, Italia

Web Developer specializing in Angular, crafting engaging and interactive web experiences for both client projects and internal initiatives. Proficient in Angular v16+ and utilize a range of libraries, from Material to custom-built solutions. Employ Agile methodologies and Git Flow workflows to ensure seamless development and collaboration. Operate primarily on Linux systems.

Key Skills:

- Angular (v16+)
- Material Design
- Custom Angular Libraries
- Agile Methodologies
- Git Flow
- Linux

Impresa o settore Servizi Di Informazione E Comunicazione | **Sito Internet:** <https://www.xacria.com>

Web programmer | Mobilesoft S.r.l | 01/01/2023 - 30/08/2023 | Roma, Italia

Angular Developer at MobileSoft Srl | Consulting for OCTO S.r.l.

Crafted exceptional user experiences leveraging Angular 14+, Angular Material, Tailwind CSS etc to build interactive web applications.

Key Achievements:

- Championed the adoption of Agile methodologies, including Scrum, fostering a collaborative and efficient development environment.
- Mentored junior developers, sharing knowledge and expertise to enhance their skills.
- Git flow method.
- Daily scrum.
- MAC OS Platform.

iOS Mobile Developer Intern | CodGo S.r.l. | CodGo Srl | 01/09/2022 - Attuale | Barcellona Pozzo Di Gotto, Italia

Internship as an iOS developer focused on learning and applying the Swift programming language. The experience covered both theoretical foundations and practical development through the creation of proprietary mobile applications, under the guidance of professional developers.

The internship included in-depth work on core iOS concepts such as View Lifecycle, Storyboards, UI components (Labels, TextFields, Buttons, StackViews, TableViews, CollectionViews, ScrollViews), native API calls, localization, protocols, extensions, and dependency management using Carthage, Swift Package Manager, and CocoaPods. Architectural patterns such as MVC and MVVM were also studied and applied. Source code versioning was managed using GitLab.

The internship also provided an opportunity to strengthen teamwork and communication skills through daily collaboration within a small development team.

The main outcome of the internship was the development of a white-label mobile application commissioned by CodGo. The application allows user registration (including social login), product browsing, and in-app purchases. Administrative users can manage products, customize store colors, default images, and other configuration aspects. The application was developed using the MVVM architecture, Git-based version control, and REST API integration with the backend. Development was carried out within a three-person team, with periodic support from a senior Swift developer.

Digital Humanities Developer | Net7 S.r.l. | Net7 Srl | 28/02/2021 - 09/06/2021 | Pisa, Italia

Design and development of a demo version of a digital edition using Muruca, a proprietary framework developed by Net7.

The project involved multiple phases and technologies, including content retrieval and management through a WordPress-based CMS with custom plugins developed by the company. A serverless layer was implemented as an intermediate layer between backend and frontend to process and adapt data for frontend consumption, using JavaScript and JSON.

Frontend development focused on defining data structures, content presentation, search and filtering mechanisms using faceted navigation, interlinking resources, and designing the overall page structure. The frontend was implemented using Angular CLI.

Additional activities included producing and editing three video tutorials demonstrating platform features using Final Cut Pro X. XML-TEI encoding was used to represent textual resources, including original texts and translations, rendered on the frontend using TEI Publisher. The project involved the use of TEI Names and Places modules along with standard TEI tags.

Technologies used included PHP, Python, JavaScript, JSON, TypeScript, and Angular.

This work was carried out as part of the internship required for the Bachelor's degree in Digital Humanities.

Istruzione e formazione

WAI0.1x : Introduction to Web Accessibility | World Wide Web Consortium | Italia

Campi di studio Introduction to Web Accessibility

Miglioramento dell'accessibilità dei servizi pubblici digitali - Accessibilità e personale dirigente: normative, adempimenti e cultura | AGID | 25/06/2025 | Italia

Hobby e interessi

Literature & History

Strong interest in literature and history, with particular attention to analytical reading and long-term perspectives, contributing to analytical thinking and contextual awareness.

Sports & Active Lifestyle

Regularly engaged in sports and physical activities, fostering discipline, consistency, and a balanced approach to both professional and personal challenges. I love Tennis, i pratiche since i was 10.

Travel & Cultural Exploration

Interested in traveling as a way to explore different cultures and perspectives, with a focus on understanding local contexts, traditions, and ways of thinking. This experience supports adaptability and openness to new environments.

Personal Frontend Projects

Actively develop personal frontend projects, including e-commerce platforms and showcase websites, as a way to experiment with new technologies, refine architectural choices, and continuously improve development practices.

Nature & Wildlife Photography

Passionate about nature photography, which encourages attention to detail, patience, and visual composition, skills that positively influence UI awareness and visual sensitivity.
